

# WINTER WEATHER HAZARDS: SCIENCE AND PREPAREDNESS AWR-331

**A Eight-hour awareness-level course designed to help prepare communities** to provide emergency managers, first responders, and community members across all sectors with a basic understanding of the latest knowledge in winter weather science, forecasting, warning, and preparedness.

Since winter weather can strike every state in the United States, this course will prepare participants to understand the basics of winter weather science, the winter weather forecasting process, how winter weather forecasts are communicated, and the fundamentals of winter weather safety and preparedness.

## Who Should Take the Course:

This course is targeted for a broad cross section of professionals involved in emergency management, first responders, large companies and/or institutions, fire services, EMS, Citizen/Volunteer groups, Law Enforcement and non-governmental organizations.
